

## VPN Requirements

For the greatest security, the VPN GlobalProtect client should be installed on an SDSU managed device. However, personal devices are allowed to have the VPN client installed if the following criteria are met:

- The device has a currently supported Operating System that is patched and updated regularly.
- The device has current anti-virus software.
- The device is password protected.
- The device may not be jailbroken, rooted, or have been subject to any other method of changing built-in protections.

All users must read and adhere to the [CSU Responsible Use Policy](#) and the [SDSU Responsible Use Policy](#).

## Minimum Operating System Version Requirements

|         |   |
|---------|---|
| Windows | <ul style="list-style-type: none"><li>• Windows 10</li></ul>  |
| MacOS   | <ul style="list-style-type: none"><li>• MacOS 10.14 - macOS Mojave</li><li>• MacOS 10.15 - macOS Catalina</li></ul> |
